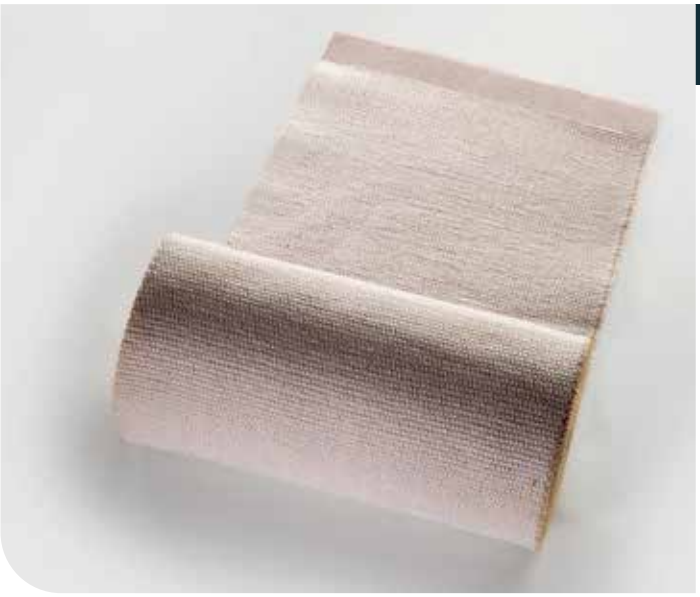
ELASTIC COMPRESSION BANDAGES



FISIODUR

62% Cotton - 38% Polyamide - Extensibility about 40% (low degree) LATEX FREE

Single-stretch, skin-coloured bandage with clips. Ideal for support and very strong compression bandages, in the treatment of oedemas, chronic lymphedemas, ulcus cruris, varicose symptom complex, support and unloading bandages. Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
774041 cm 6 x 5 m stretched	10 pieces
774042 cm 8 x 5 m stretched	10 pieces
774043 cm 10 x 5 m stretched	10 pieces
774044 cm 12 x 5 m stretched	10 pieces

FISIOLASTIC

100% cotton - Extensibility about 90% (medium degree) LATEX FREE

Single-stretch, skin-coloured bandage with clips.
Ideal for support and strong constant compression bandages at rest. The compression value does not increase during muscular activity.Suitable for varicose symptom complex, antithrombotic prophylaxis, supportive and unloading bandages.
Individually packed in cellophane or case for maximum hygiene

Ref.	Packaging
772020 cm 6 x 5 m stretched	10 pieces
772021 cm 8 x 5 m stretched	10 pieces
772022 cm 10 x 5 m stretched	10 pieces
772023 cm 12 x 5 m stretched	10 pieces

FISIOLASTIC PLUS

98% cotton - 2% Elastan - Extensibility about 70% (medium degree)

Single-stretch, skin-coloured bandage with clips.
Ideal for support and strong constant compression bandages at rest. The compression value does not increase during muscular activity. Indicated in the varicose symptom complex, antithrombotic prophylaxis, supportive and unloading bandages. Individually packed in cellophane or case for maximum hygiene

Ref.	Packaging
P 772020 cm 6 x 5 m stretched	10 pieces
P 772021 cm 8 x 5 m stretched	10 pieces

P 772023 cm 12 x 5 m stretched	10 pieces

ELASTIC COMPRESSION BANDAGES

FISIOFLEX MEDIA

80% cotton - 20% Elastan - Extensibility about 170% (high degree) LATEX FREE

Single-stretch, skin-coloured bandage with clips. Suitable for support and strong compression bandages.
Suitable for varicose symptom complex, phlebostasis, edemigenous
syndromes, post-surgical treatment. Individually packed in cellophane or case for maximum hygiene.

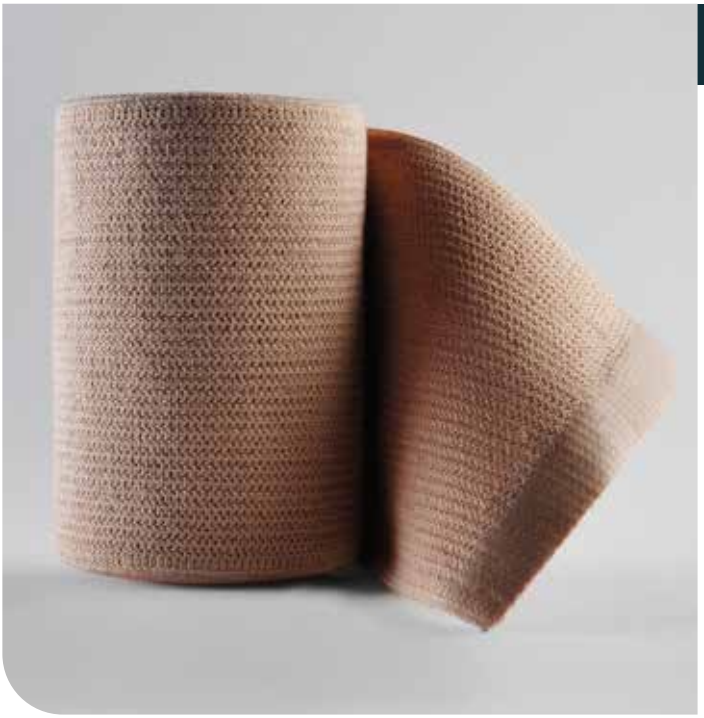
Ref.	Packaging
774001 cm 6 x 7 m stretched	10 pieces
774002 cm 8 x 7 m stretched	10 pieces
774003 cm 10 x 7 m stretched	10 pieces
774004 cm 12 x 7 m stretched	10 pieces
774016 cm 8 x 5 m stretched	10 pieces
774007 cm 10 x 5 m stretched	10 pieces
774008 cm 12 x 5 m stretched	10 pieces
774009 cm 10 x 14 m stretched	10 pieces

FISIOFLEX FORTE

80% cotton - 20% Elastan - Extensibility about 170% (high degree) LATEX FREE

Single-stretch skin-coloured bandage with clips.
Ideal for support and strong constant compression bandages in the varicose symptom complex, in post-surgical treatment, in antithrombotic prophylaxis, supportive and unloading bandages, prevention and treatment of trauma in sport.
Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
774011 cm 8 x 7 m stretched	10 pieces
774012 cm 10 x 7 m stretched	10 pieces
774013 cm 12 x 7 m stretched	10 pieces



FISIOFLEX B

80% Cotton - 20% Elastan - Extensibility about 150% in length and about 10% in width (high degree) LATEX FREE

Single-stretch, skin-coloured bandage with clips.
Omnidirectional elasticity (polyextensible). Ideal for support and constant compression unloading bandages in post-surgical treatment and in venous insufficiency therapy, joint bandages, distortions, dislocations, contusions, for muscle tearing and sports trauma.
Individually packed in case for maximum hygiene.

Ref.	Packaging
774031 cm 6 x 7 m stretched	10 pieces
774032 cm 8 x 7 m stretched	10 pieces
774033 cm 10 x 7 m stretched	10 pieces
774034 cm 12 x 7 m stretched	10 pieces
774035 cm 15 x 7 m stretched	10 pieces
774060 cm 8 x 10 m stretched	10 pieces
774992 cm 10 x 10 m stretched	10 pieces

ADHESIVE ELASTIC BANDAGES

FISIOPLAST PLUS

98,5% cotton – 1,5% Elastan - Extensibility about 65% (low degree) LATEX FREE

Elastic bandage with longitudinal extensibility, raw edges and zinc oxide-based adhesive. Porous, with high water vapour permeability. With guide thread.
The bandage is easily suited to the use of the most varied techniques and of different compression degrees, thanks to its raw edges that facilitate its application even in areas with roughness. Suitable for compressive bandages in varicose and vascular therapies in general, for functional bandages in orthopedics, supportive bandages in distortions, dislocations, contusions and muscular tears, prevention and treatment of sports trauma, etc.
Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
775011 - cm 6 x 4,5 m stretched	10 pieces
775012 - cm 8 x 4,5 m stretched	10 pieces
775013 - cm 10 x 4,5 m stretched	10pieces
775014 - cm 10 x 4,5 m stretched	10pieces
775015 - cm 7,5 x 4,5 m stretched	10pieces

FISIOPLAST BIEL

100% Cotton - Extensibility: 70% in length, 40% in width LATEX FREE

Double elastic compression bandages with longitudinal and transversal extensibility with hypoallergenic adhesive. Its pure, unbleached cotton textile backing guarantees a strong support for the bandaged area. Absolutely free from chemical solvents and latex. Its medium-low extensibility allows the application of very strong compressions even in the resting limb condition. Therefore, FISIOPLAST BIEL proves to be a bandage of choice in medium- and long-term treatments. Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
772050 cm 6 x 4,5 m stretched	10 pieces
772051 cm 8 x 4,5 m stretched	10 pieces
772052 cm 10 x 4,5 m stretched	10 pieces

FISIOPLAST LIST

100% cotton - Extensibility about 70% (medium degree) LATEX FREE

Monoextensible adhesive bandage with external strip coating. Natural white colour, loose hemming. Highly hypoallergenic adhesive mass. Ideal for compressive bandages in the varicose symptom complex, support in dislocations, distortions and tears. Sports and functional bandages. Ideal for post-immobilisation bandages with plaster, in FKT. The exclusive external strip coating of the adhesive guarantees excellent tolerability. Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
775001 cm 6 x 4,5 m stretched	10 pieces
775002 cm 8 x 4,5 m stretched	10 pieces
775003 cm 10 x 4,5 m stretched	10 pieces

SELF-ADHESIVE ELASTIC BANDAGES

SELFADHESIVE SOFT LF

36% Cotton – 26% Viscose - 38% Synthetic fibres - Extensibility about 80% (medium degree) LATEX FREE

White monoextensible bandage. Self-adhering (cohesive), suitable for fixing dressings, protective bandages on contusions, excoriations and hematomas.
Ideal for prevention and treatment of light sports trauma, light supportive and preventive bandages.
Its exceptional softness and air permeability make it tolerable by the skin and easy to use. It stops easily and safely any dressing by wrapping even complex anatomical and articular parts without wrinkling.
Individually packed in cellophane or case for maximum hygiene

CROHAFT LF

70% Cotton - 30% Polyamide. Extensibility in length about 65%, in width about 50% LATEX FREE

Bandage self-adhering (cohesive) on both sides, polyextensible, white colour. The bandage adheres to the underlying lap without adhering to skin, clothing and hair. Suitable for fixing dressings and joint bandages. Thanks to its polyextensibility, it can be applied to every joint district, to every part of the body also of particularly irregular anatomical shape without wrinkling. Useful in phlebology for fixing of advanced dressings and equally practical as a finishing on compressive bandages to make the bandage more stable and durable. Thanks to its crepe and wide mesh fabric, it is particularly soft to the touch and pleasant on the skin, allows any movement, and is very permeable to the air.
The textured edges (to avoid fraying) are 20% looser than the body
of the bandage, in order to prevent strangulation and to further favour a complete joint trend. Very convenient for securing long leg plaster splints, orthopedic and physiatrical splints. Individually packed in cellophane or single case for maximum hygiene.
Sterilizable in autoclave.

SELF-ADHESIVE ELASTIC BANDAGES

SELFADHESIVE FORTE

98% Cotton - 2% Elastan - Extensibility about 90% (medium degree) LATEX FREE

Single-stretch skin-coloured bandage. Self-adhesive (cohesive). Elastocompressive, tearable, ideal for support and medium-strong constant compression bandages in varicose symptom complex, in all antithrombotic prophylaxis, in support and unloading bandages.
Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
772011 cm 8 x 4,5 m stretched	10 pieces
772012 cm 10 x 4,5 m stretched	10 pieces

SELFADHESIVE LIGHT

40% Cotton - 60% Polyamide - Extensibility about 80% (medium degree) LATEX FREE

Single-stretch skin-coloured bandage. Self-adhesive (cohesive) Suitable for fixing dressings, protective bandages on contusions, excoriations and hematomas. Pre-bandage for skin protection. Treatment of light sports and work trauma, bandaging in varicose therapy.
Individually packed in cellophane or case for maximum hygiene.

SELF-ADHESIVE ELASTIC BANDAGES

FISIOLASTIC COHESIVA PLUS MEDIA

98,1% cotton – 1,9% Elastan – Medium Extensibility: > 70-140% LATEX

Skin-coloured self-adhesive (cohesive) bandage with medium longitudinal stretch for support and compression.
Indicated for medium-strong compression support and unloading bandages even when moving, post-surgical treatment and in venous insufficiency therapy, post-mastectomy bandages. Support and compression bandages for articulations, distortions, dislocations, contusions, muscle strains. Prevention and treatment of sports and work-related injuries. Ensures adherent and secure bandages in both vascular and orthopaedic fields. The bandage's great versatility allows it to be used in a wide variety of cases to achieve optimal compression according to the specialist's exclusive judgement. The device should be applied to the affected area without any fasteners. In fact, thanks to the uniformity of the cohesive material, the bandage adheres effectively to itself, and not to the skin or hair.Individually packed in cellophane or case for maximum hygiene.

FISIOLASTIC COHESIVA PLUS ALTA

98,1% cotton – 1,9% Elastan – High Extensibility: > 140% LATEX

Skin-coloured self-adhesive (cohesive) bandage with long longitudinal stretch for support and compression.
Indicated for medium-strong compression support and unloading bandages for articulations, distortions, dislocations, contusions, muscle strains, post-surgical treatment, in venous insufficiency therapy and post-mastectomy bandages.
Ensures adherent and secure bandages in both the vascular and orthopedic fields. The bandage's great versatility allows it to be used in a wide variety of cases to achieve optimal compression according to the specialist's exclusive judgement. The device should be applied to the affected area without any fasteners.

SELF-ADHESIVE ELASTIC BANDAGES

SELFADHESIVE TNT

80% Polyester - 20% Elastan - Extensibility about 120% (medium degree) LATEX FREE

Monoextensive skin-coloured bandage. Self-adhesive (cohesive). Suitable for orthopedic support bandages and for phlebology field; ideal for bandages with medium constant compression.
Excellent in sports bandages for its strength, resistance, lightness and breathability.
Used in the veterinary field, especially for small animals: thanks to its self-fixing capability, it does not slip and does not adhere to animal hair.
Individually packed in cellophane or case for maximum hygiene.

Ref.	Packaging
772062 cm 5 x 4,5 m stretched	10 pieces
772063 cm 7,5 x 4,5 m stretched	10 pieces
772064 cm 10 x 4,5 m stretched	10 pieces

772065 cm 15 x 4,5 m stretched	10 pieces

ZINC PASTE BANDAGES

PRONTOZINK

Support: 100% cotton - ANELASTIC TYPE. White colour impregnated with zinc oxide paste (10% by weight)

ANELASTIC TYPE. Pure cotton bandage impregnated with paste with high zinc oxide content. Suitable for treatment of thrombophlebitis, varicose veins, ulcus cruris. Used as antiphlogistic bandages in distortions, dislocations, contusions and oedema syndromes, post-treatment of fractures, bone and joint surgery, combined with adhesive bandages. Individually packaged in aluminised cellophane (special sealed packaging) to preserve the characteristics of the bandage.

Ref.	Packaging	Imballo

ZINC PASTE BANDAGES

ZINCOSAN CUMARINA

Support: 100% cotton - ANELASTIC TYPE impregnated with zinc oxide paste (10% by weight) and Coumarin. White colour. LATEX FREE

ANELASTIC TYPE WITH COUMARIN. Pure cotton bandage impregnated with zinc oxide and coumarin paste. Indicated for treatment of lymphoedema fluids, in combination with mono or bielastic compression or adhesive bandages. This bandage combines the antiphlogistic effect of the zinc oxide paste with the anti-oedemigenous properties of coumarin, ensuring excellent percutaneous absorption. Excellent in post-thrombotic oedema, lymphoedema of both the upper and lower limbs. It has a positive therapeutic effect in the rehabilitation of complicated IVC without ulcer, while in complicated IVC with ulcer it has a strong action favouring granulation and re-epithelisation. The bandage is a recognised therapeutic key in lymphedema fluids therapy. The short (preferably) or medium-elasticity bandage is currently used to promote the reabsorption and drainage of stagnant fluids and proteins. In addition to the traditional bandages, we offer this bandage based on the properties of zinc oxide (eutrophicating, disinfectant and antiphlogistic) and above all on the effects of plant-derived coumarin (pro-lymphokinetic, favouring the lysis and resorption of protein macromolecules).Suitable for fixed bandages in case of lymphoedema, post-traumatic oedema, phlebolymphedema. Individually packed in aluminised cellophane.

PRONTOZINK CREMA PROTETTIVA

With 10% zinc oxide

Soft skin protection paste with high emollient, soothing and decongestant power.
It helps to prevent redness, irritation, cracking and maceration.

INSTRUCTIONS FOR USE
Apply a layer of cream on clean, dry skin over the whole affected area, massaging until almost completely absorbed.
A slight white residue will remain.

Ref.	ml.	Packaging
776014	100	25

FIXING BANDAGES

FISIOGAUZE E

36% Cotton - 26% Viscose - 38% Synthetic Fibres Extensibility about 80% (medium degree) LATEX FREE

White monoextensible bandage.
Suitable for fixing of dressings, light protective bandage on contusions, excoriations and hematomas, coverage on pomades and ointments.
Its exceptional softness and air permeability make it perfectly tolerable.
Easily conformable even on difficult anatomical areas such as, for example, fingers and toes in bandages for lymphatic diseases.

PRONTOFOAM

100% high-elasticity omnidirectional medical polyurethane.
LATEX FREE

Polyurethane foam bandages and anti-decubitus adhesive strips. High air permeability. Suitable for general padding, skin protection or bone protuberances protection from the action of aggressive adhesive bandages. The strips have a highly hypoallergenic adhesive. Packaged in white cellophane bags for protection against UV rays to prevent yellowing of the product.

784015 cm 7 x 27,5 m	48 pieces

PRONTOGUM

100% rubber latex of considerable elasticity

Rubber latex pads and strips.
For precise and eccentric compression. It can be cut and shaped with scissors.
The pads and strips can be shaped according to the problem and the surface to be treated. The application must always be carried out with the smaller shape in contact with the skin and the larger one above, in order to avoid unwanted tightening effects.

PATCHES FOR FUNCTIONAL AND NEUROMUSCULAR BANDAGES

FISIOTAPE

Canvas fabric - Knurled edges, easy to cut. LATEX FREE

ANELASTIC PATCH FOR FUNCTIONAL BANDAGES
Equipped with hypoallergenic adhesive with a high percentage of zinc oxide and rubber. Used for preparation of functional bandages (combined with elastic adhesive bandages or individually). Suitable for general orthopedic fixings and Kramer splints and sticks fixing.
Particularly suitable in the sports sector because of its strength and the ease with which it can be torn thanks to the lateral knurling.

PRONTOROLL F

Type in elastic non-woven fabric with non-adhesive T.N.T. continuous central pad. Hypoallergenic adhesive mass in water-dispersion polyacrylic resins. Indicated in first aid and emergency services. The absorbent compress, which is absolutely inert, allows the use of medicinal substances exclusively upon medical advice, even if the use of ointments and powders tends to reduce the gas permeability of the product. The use of the elastic adhesive backing facilitates application in anatomically difficult areas, enabling accurate protection.

Ref.	Hospital packaging of
770061 cm 4 x 5 m	1 piece
770062 cm 6 x 5 m	1 piece
770063 cm 8 x 5 m	1 piece

PRONTOSORB ADESIVO

Type in elastic adhesive T.N.T. with non-adhesive T.N.T. central pad. Particularly suitable in dressings for its high absorbency, equal to 13 times its weight. It does not adhere to the wound and stimulates healing in a short time. The elastic adhesive backing is ventilated and hypoallergenic.

"ULCUS CRURIS" ELASTIC COMPRESSION KIT

Disposable elastic compression kit containing a multi-layer treatment system for all Chronic Venous Insufficiency diseases in general, mixed pathologies of the lower limbs in all their stages and ULCUS CRURIS in particular.
The "ULCUS CRURIS" Elastic Compression Kit is designed for and dedicated to doctors, physiotherapists, nurses, and to all professionals in the sector who use the compression bandage therapy. Its correct application requires basic bandaging knowledge. Each individual component in the kit is numbered in order of use. The kit is supplied with instructions and "step-by-step" photographs. Particularly recommended for treatment of venous ulcers of the lower limb, but generally for all IVC pathologies in all their stages, for mixed ulcers and of course for the ulcus cruris.

KIT CONTENTS [Ref. #781997]

Bandage	Size	Quantità	Utilizzo
Zincosan Cumarina	cm 8 x 5 mt.	1 piece	To be used on skin from toes to malleoli with crossed bindings
Zincosan Cumarina	cm 10 x 5 mt.	1 piece	To be used on skin from heel to knee with crossed bindings
Prontotube TG 7	cm 8 x 2 mt.	1 piece	To be used for covering the first layer and then upside down on the last
Prontogum Air	cm 8 x 2 mt.	1 piece	For padding along the tibial crest, on the forefoot, on the malleoli
Fisiodur	cm 8 x 5 mt.	1 piece	Bandage with very short extensibility (40%) for foot and malleoli
Fisiodur	cm 10 x 5 mt.	1 piece	Bandage with very short extensibility (40%) to be used from ankle to knee

"Ulcus Cruris" KIT REPLACEMENT [Ref. #781998]

Bandage	Size	Quantità
Zincosan Cumarina	cm 8 x 5 mt.	1 piece
Zincosan Cumarina	cm 10 x 5 mt.	1 piece
Prontotube TG 7	cm 8 x 2 mt.	1 piece

We also offer simplified kits for treatment of the ulcer with a system that includes a dressing and a series of bandages for the implementation of multilayer bandages with "telescopic" technique, as well as a series of kits for the treatment of Lymphedema, both for upper and lower limbs.

ELASTIC COMPRESSION KITS FOR LYMPHATIC PATHOLOGIES

Disposable elastic compression kit containing a multi-layer treatment system for lymphatic diseases, at their all stages, which require complete bandaging. The KIT contains the effective "zinc oxide and COUMARIN paste bandages" to be used directly on the skin for a better absorption of the oedema.
The LINFO KIT is designed for and dedicated to medical professionals, physiotherapists and nurses. Its correct application requires knowledge and experience of the lymphatic bandage technique.

After-sales service

Filmar, medical brand by Remmert, is able to provide you with technical-scientific advice at your offices with the collaboration of various experts according to the type of product.

It is also available to organise courses on the use of its marketed products, training courses for your staff, courses for updating and optimising the use of its products.

Always present at the main national and international congresses and fairs of the sector in order to maintain a high updating level, while at the same time keeping alive our contact with the needs of the specialists and of all our customers.

GENERAL CONDITIONS OF SUPPLY: THIS CATALOGUE CANCELS AND REPLACES THE PREVIOUS ONE AND IS EFFECTIVE FROM JANUARY 2026
Supplies shall be governed by these conditions, except for derogations resulting from specific written agreement. Any changes during the course of the supply do not constitute novation to the contract, in particular, the execution of the supply may at any time be suspended in the event of a change in the capital conditions of the purchaser in accordance with and to the effects of art. 1461 of the Civil Code.
PRICES
Current list prices are valid unless sudden changes in currency or costs are made. In the impossibility of prior communication, we inform you that these changes will be applied without notice. Warning: If the order does not respect the product sales unit, we reserve the right to modify it in more or less.
MINIMUM ORDER
Orders less than € 300 net of VAT cannot be processed. In case of unshipped goods, the remainder is automatically cancelled if the amount is less than € 50.00 net of VAT.
TRANSPORTATION
In free port with freight forwarder in agreement with us for orders of net amount higher than € 2000 net of VAT. Transportation and collection costs will be charged for orders of a lower amount.
PAYMENT
In the absence of any other agreement, the payment is understood as cash upon delivery of the goods or before the shipment itself. Payments are due within the agreed time limits also in the case of delay of the arrival of the goods and/or of partial or total losses which occurred during the transport, as well as in the case where the goods made available by us to the purchaser are not collected by the purchaser in person.
Current bank interests will be charged in the event of late payment.
CLAIMS AND COMPLAINTS
Any claim concerning the quality, quantity or type of goods supplied must be made in writing within 8 days of reception of the goods by the purchaser. No legal claim concerning the quality of the goods may be made, even by way of exception, if the regular payment of the goods to which the complaint relates does not take place. Any claim concerning a single delivery of goods does not exempt the purchaser from the obligation to collect the remaining quantity of goods within the limits of the order or commitment.
INSURANCE
The goods of our property are insured against all damages caused by transportation up to the customer's home. The guarantee is operative and therefore valid as long as the anomalies are detected at the moment of delivery of the goods. These anomalies shall be noted on the shipper's dispatch form with reservation and justification. Example: Missing No. 1 neck. Damaged or wet neck ... etc. any complaint must be made in writing within 8 days of receipt of the goods, by registered mail, to the attention of THE LOGISTICS OFFICE, announcing the incident by telephone.
Telephone: +39 011 42 71 011 - Fax: +39 011 27 63 723. Failure to comply with the procedure may mean that we cannot be liable for the damage.
FORCE MAJEURE
In any case of force majeure which prevents us from executing the contract or maintaining the conditions, we shall be entitled to cancel the contract or, at our option, to request its execution within a time limit to be fixed.
COMMERCIAL RETURNS
Returns are not accepted unless authorised in advance. Without this condition, the goods will be automatically returned to the sender with charge of the costs, as clearly indicated in the "GENERAL CONDITIONS OF SUPPLY":
We will not accept returns unless previously and expressly authorised by our Commercial Office.
